

FAECAL SLUDGE MANAGEMENT — FOR HEALTH AND HYGIENE!

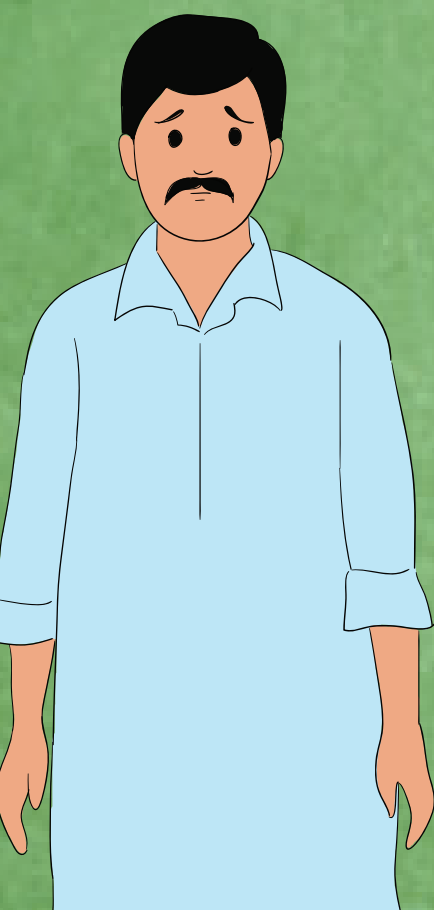

The toilet's shabby and broken,
a state of disrepair

Think why this has happened,
it's clearly a lack of care!

Now we have a twin pit,
the pipes have been repaired

The yield will be some rich *khad*,
and dignity unimpaired!

FAECAL SLUDGE MANAGEMENT — FOR HEALTH AND HYGIENE!

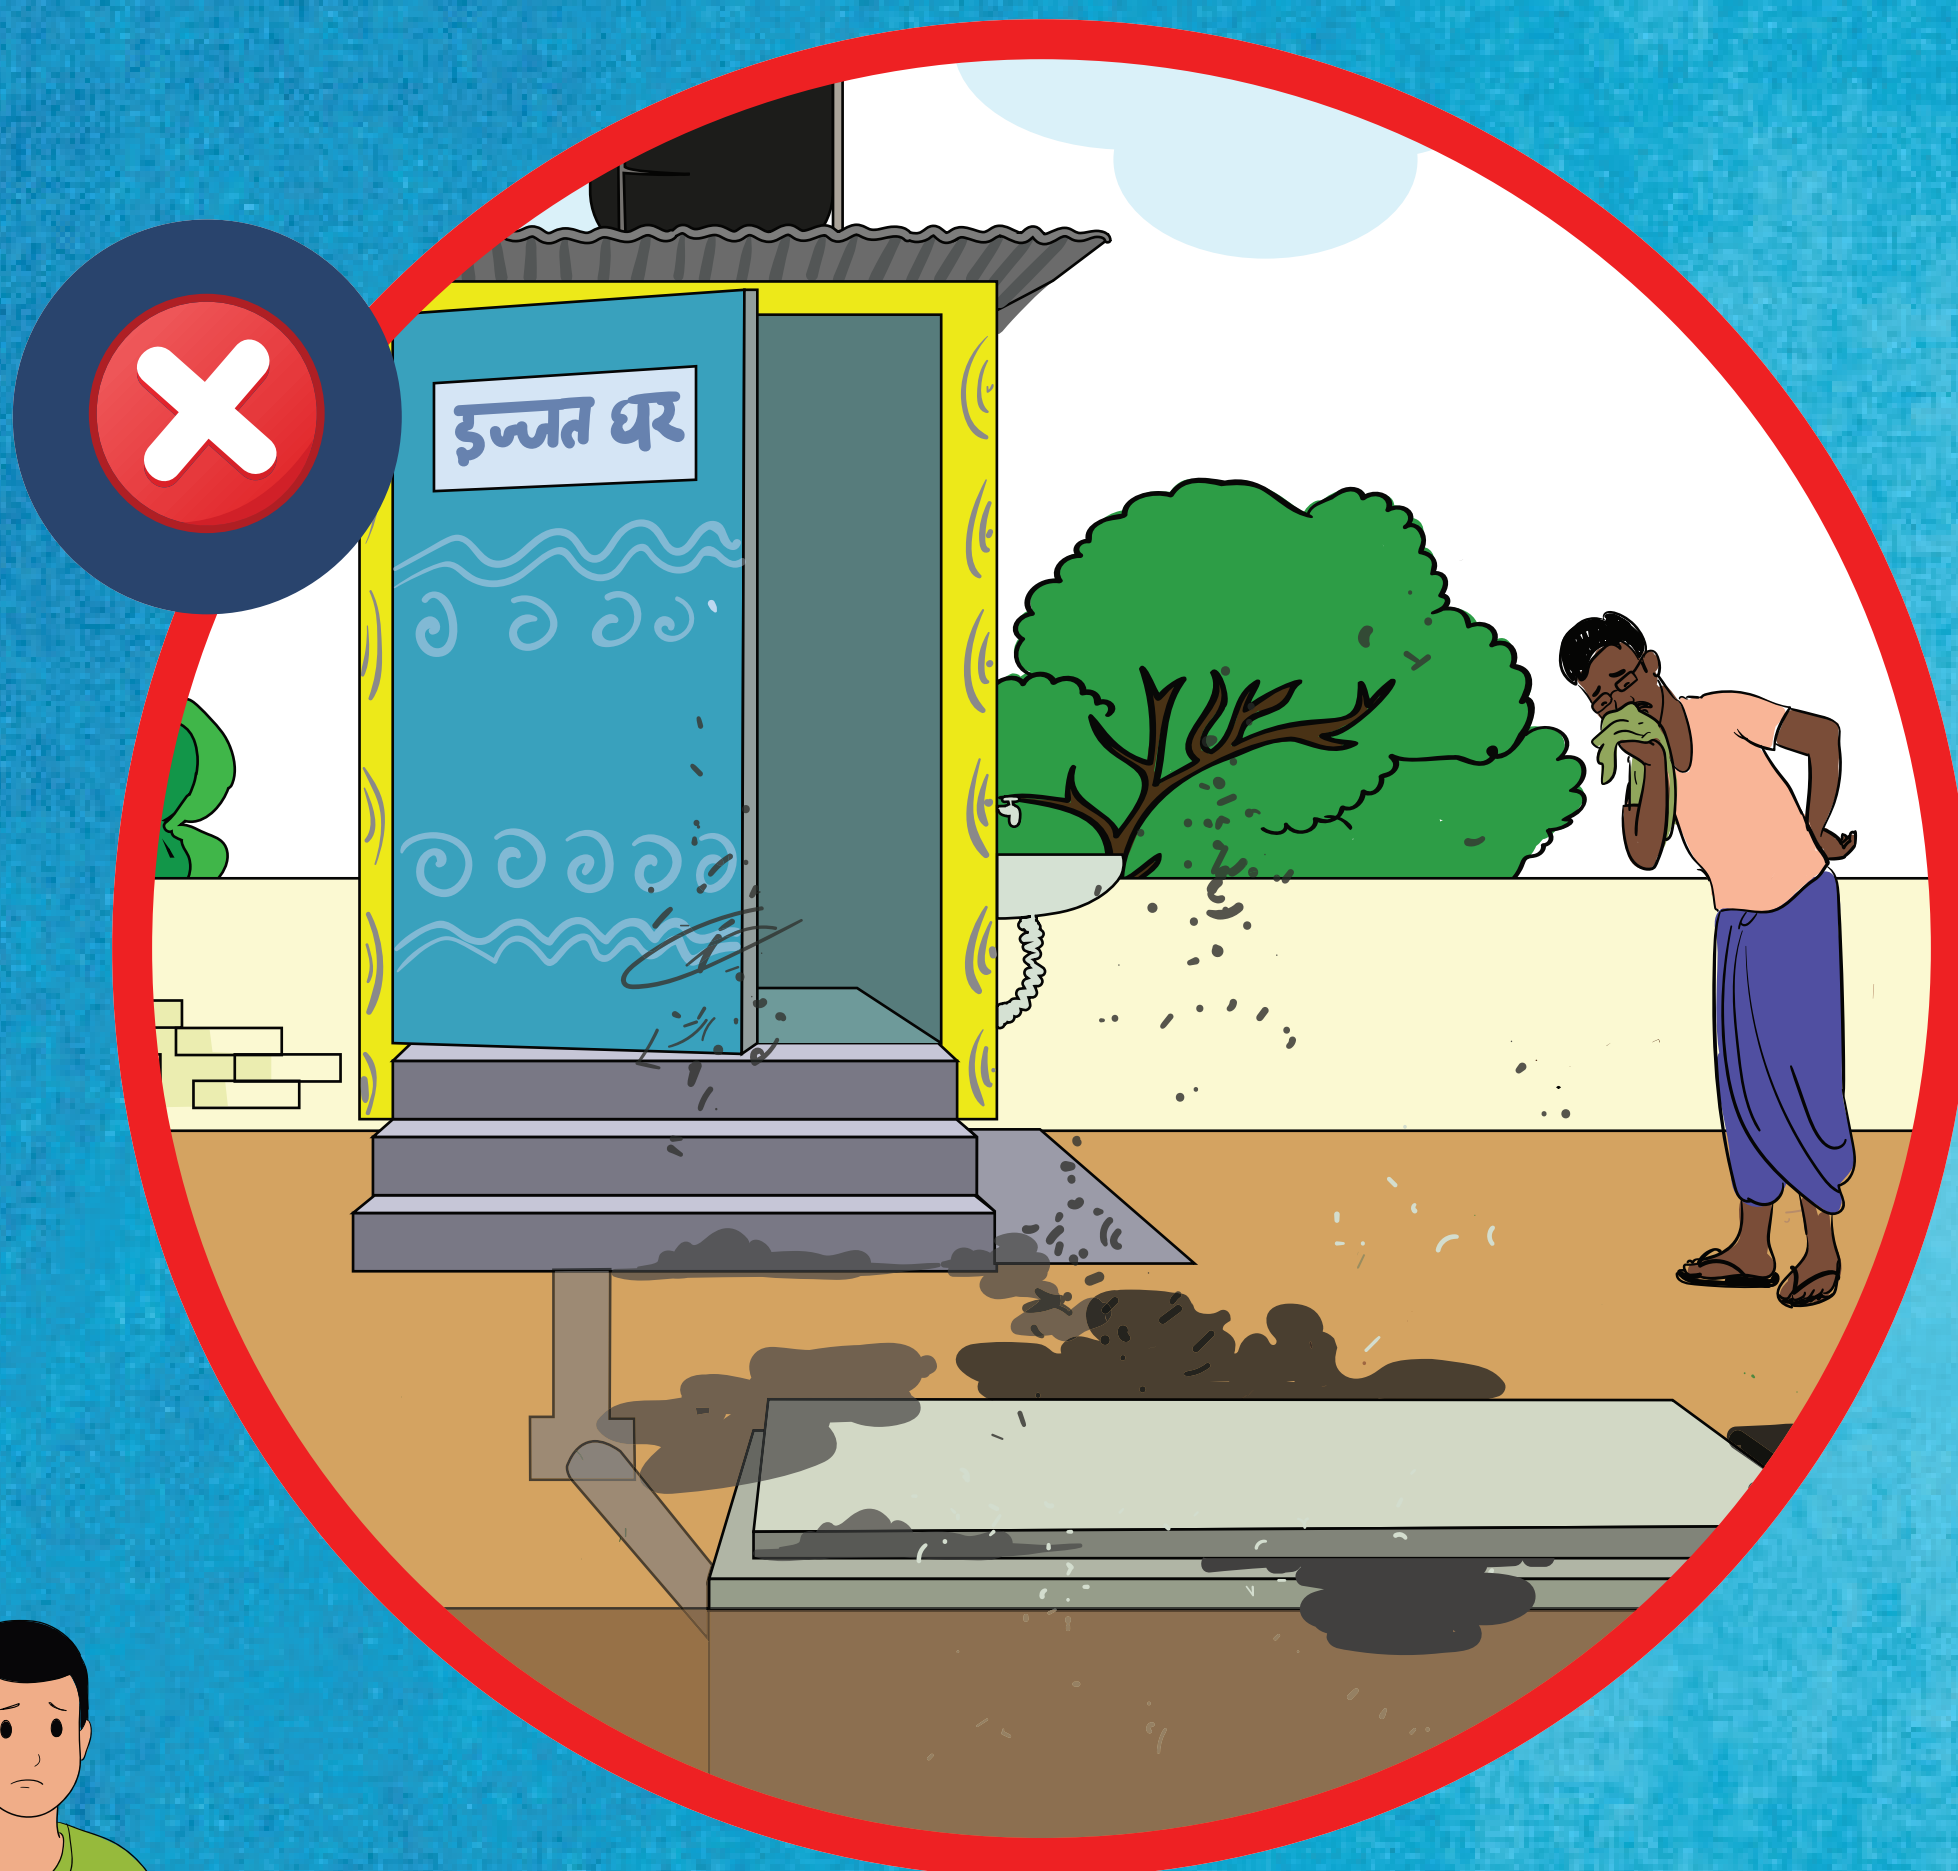

A single pit toilet, it's always going to fail
Soon it will overflow, it can't take in the scale!

A twin pit works just perfectly,
year after year,
The choice of toilet technology,
it surely should be clear!

FAECAL SLUDGE MANAGEMENT — FOR HEALTH AND HYGIENE!

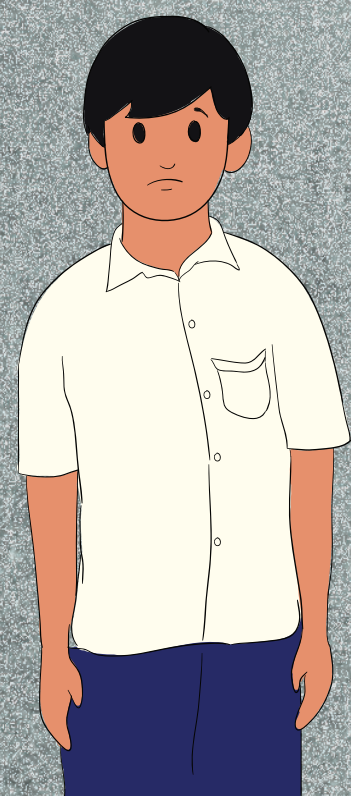

Often people build toilets,
with a septic tank alone
It hasn't the capacity,
this practice we can't condone!

A septic tank with soak pit,
make a perfect pair,
The sludge is managed perfectly,
with very little care!

FAECAL SLUDGE MANAGEMENT – FOR HEALTH AND HYGIENE!

Septic tank cleaning,
is no work for human hands

Indignity to the cleaner,
it pollutes water and lands!

Using the right technology,
the cleaner we protect

Treated sludge as *sona khad*,
healthy crops our fields bedeck!
